

The new Laboratory Information System (LIMS)

Cheshire and Merseyside
Acute and Specialist Trust Provider Collaborative

EVOLUTION

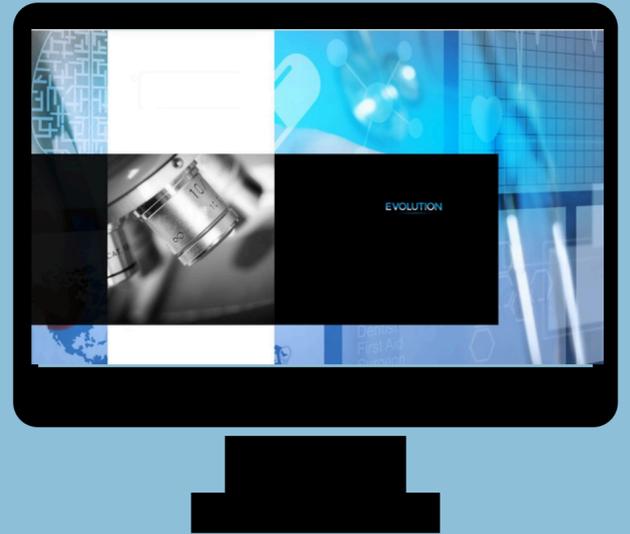

BENEFITS AND IMPROVEMENTS

Cheshire and Merseyside Pathology Network (CMPN)

The new Laboratory Information Management System (LIMS)*, a new single IT system will securely connect five pathology laboratories at:

- Countess of Chester Hospital NHS Foundation Trust
- Wirral University Teaching Hospitals NHS Foundation Trust
- Warrington and Halton Teaching Hospitals NHS Foundation Trust
- Mersey and West Lancashire Teaching Hospitals NHS Trust
- Liverpool Clinical Laboratories, part of University Hospitals of Liverpool Group

And will provide the following benefits and improvements:

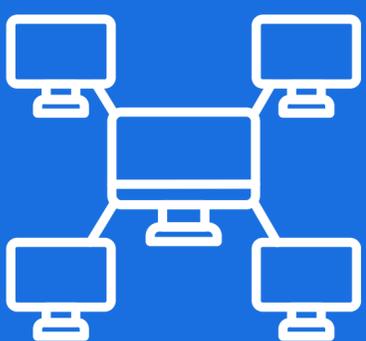

Systems

Reduction of the number of systems and work arounds that staff currently use

Paperless

Elimination of paper-based and Excel-based systems of recording information

Harmonisation

Safely share test results across the region, regardless of where the original test was carried out and reduce the need for re-testing

Fewer delays

Support tests to be processed quicker, so patients can receive their results and begin any required treatment sooner.

Experience

Improved staff experience due to standardised processes and reduced administrative burden

Get involved and help to influence how the system could work for our processes.

Speak to your line manager or operational lead.

For more information:

*The LIMS is called Evolution and supplied by Magentus.
